| Eas                    | 29.5  | mJ   |

#### Description

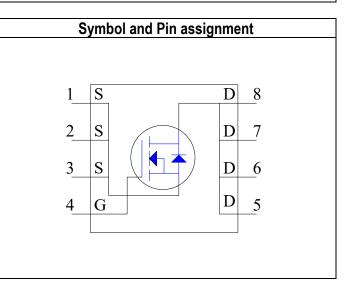

These devices used double-gate structure of MOSFET to provide excellent electrical parameter. There is high speed switching capacity, low R<sub>DSON</sub> resistance, low gate charge and stable characteristics for these devices. Moreover, it is a helpful choose for raise efficiency or reduce consumption in circuit. These features combine to be an advantage design for use in wide variety of application including converter and inverter design.

Features

- Sast switch capacity
- Low RDS(ON) resistance
- ♦ Low input capacitance
- Contract Contract
- Ruggedness commutation capability
- O Pb-free lead plating; RoHS compliant

#### **Potential application**

- AC-DC adaptor
- DC-DC converter
- Quick Charger
- Electric tool application
- Motor/Fan driving application
- Synchronous Rectifier for Power Delivery

#### **Order Information**

|    | Item             | Description  |
|----|------------------|--------------|
| 1. | Order Code       | DG60N02S     |
| 2. | Part Number      | DG60N02S     |
| 3. | Package Type     | SOP-8        |
| 4. | Package Code     | S            |
| 5. | Packing Type     | Tape & Reel  |
| 6. | Quantity in Pack | 3,000        |
| 7. | RoHS Status      | Halogen-Free |

DG-FET™ 60V N-Channel Power Enhanced Mode MOSFET

#### Absolute Maximum Ratings (TJ=25°C unless otherwise noted)

#### **Thermal Resistance Ratings**

| Parameter                            | Symbol             | Conditions             | Min. | Тур. | Max.  | Unit |
|--------------------------------------|--------------------|------------------------|------|------|-------|------|
| Thermal resistance, Junction-Case    | R <sub>0JC-N</sub> | Please refer to Note 5 | -    | -    | 3.26  | °C/W |
| Thermal resistance, Junction-Ambient | Roja-n             | Please refer to Note 5 | -    | -    | 43.86 | °C/W |

#### Notes:

- 1. Limited by silicon chip capability and *R*<sub>OJC-N</sub> junction-to-case thermal resistance.
- 2. The maximum current rating is limited by package and  $R_{OJA-N}$  junction-to-ambient thermal resistance.
- 3. Must be ensure junction temperature does not exceed 150-degree C. (Pulse Width≦380uS, Duty≦2%)
- 4. Limited by  $T_{Jmax}$ , starting  $T_J=25^{\circ}C$ , L=0.1mH, Rg=25 $\Omega$ , ID=24.3A, VGS=10V.
- 5. The value of thermal resistance is measured with the single device mounted on 1 inch<sup>2</sup> FR-4 PCB with 2 oz. copper under a still air environment temperature is 25°C based on JEDEC standard JESD51-14 and JESD51-2a. Thermal resistance obtained depends on the user's specific board design and given application.

Silicongear Corporation, its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Silicongear"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Silicongear makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Silicongear disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Silicongear's knowledge of typical requirements that are often placed on Silicongear products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and/or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Silicongear's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Silicongear products are not designed for use in medical, life-saving, or lifesustaining applications or for any other application in which the failure of the Silicongear product could result in personal injury or death. Customers using or selling Silicongear products not expressly indicated for use in such applications do so at their own risk and agree to fully indemnify and hold Silicongear and its distributors harmless from and against any and all claims, liabilities, expenses and damages arising or resulting in connection with such use or sale, including attorneys fees, even if such claim alleges that Silicongear or its distributor was negligent regarding the design or manufacture of the part. Please contact authorized Silicongear personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Silicongear. Product names and markings noted herein may be trademarks of their respective owners.

Silicongear and the Silicongear logo are trademarks of Silicongear Corporation. All other brand and product names appearing in this document are registered trademarks or trademarks of their respective holders.
